Expandable "Multi-Purpose" Pet Kennel System

Size: 2 1/2' x 21/2' x 3'

Congratulations on your purchase of the My Pet Companion EXPANDABLE KENNEL, the ideal choice for pets and their parents! Permanently-hinged sturdy side panels and NO-TOOLS assembly make this kennel the fastest, easiest assembly on the market today. This remarkable kennel may be easily expanded into a wide variety of configurations by simply adding more individual kits.

INCLUDED IN THIS KIT:

4 Pre-hinged side panels including 1 Double Door gate panel

8 Custom fitted nylon panel connectors

4 Elastic Cords for securing the cover

1 complete Cover including the cover and the cover support tubes.

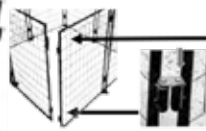

STEP 1 – Simply unfold the pre-hinged panels and make the final connection using the "snap-in" spring-hinges. Insert the lower bar into the receiver. Press down on the top of the spring hinge on the upper portion of the panel, insert and snap into place.

STEP 2 – Insert the panel connectors into the tops and the bottoms of each panel at each hinge location as shown here.

STEP 3 – Add the kennel cover.

First assemble the cover support tubes. The individual sections simply slide together.

Insert the kennel cover into the tops of the connectors as shown here.

Note: the unused portion of the connector should be positioned outside of the kennel.

Add the cover, tighten the hook and loop at each corner and secure the cover to the panels using the elastic cords as pictured

Your Expandable kennel may be used with or without a cover. It is designed for stability.

The assembly is now complete. Remarkably fast and easy!

Expanding Your My Pet Companion EXPANDABLE Pet Kennel

This exceptional pet kennel was designed to allow for expansion to a wide variety of configurations by using additional kits. You will find this to be as easy as the initial assembly using **NO-TOOLS & NO BRACKETS**.

How To Expand Your My Pet Companion EXPANDABLE Pet Kennel An Example

Every 2 1/2' section is connected with an innovative spring-loaded hinge and every hinge location is secured by a custom-fit nylon connector. These are the keys to this kennel's simple assembly and expansion capabilities.

Release the spring hinge at any corner and rotate in parallel to the adjoining side panel. Add additional panels to complete this configuration. Simply re-attach the panels at the corners using the spring-loaded hinges.

Adding a divider panel may be done quickly and easily. Insert a complete 4' panel and attach using a connector as shown here.

As shown in the pictures an additional cover can be added to any part of the kennel that is 2 1/2' x 2 1/2' in shape. Unlike any other modular kennel in the industry covers may be added next to each other.

This versatile kennel can also be used as a gate system to keep animals in or out of certain areas. The utility of this kennel is virtually endless.

This unique expandable kennel can be changed or further expanded at any time in only minutes.

IMPORTANT CAUTIONS:

- It is highly recommended that when your EXPANDABLE is placed outdoors especially when a cover is used, that ground stakes are used to secure the kennel to the ground to protect against wind and any other unwanted movement of the kennel.
- If your pet is placed in your kennel make certain your pet is provided with ample food and water for the time period.
- Do not leave your pet alone for extended periods of time in your kennel. Changing your pet's surroundings and access to exercise is critical to your pet's health – both physical and mental.
