Expandable "Multi-Purpose" Pet Kennel System Size: 8' x 4' x 4 1/2'

Congratulations on your NEW EXPANDABLE KENNEL! It is the ideal choice for pets and their parents. Permanently hinged sturdy side panels and No-Tools-Required make this kennel's assembly the fastest and easiest on the market. Expand your new kennel into a wide variety of configurations with the addition of other kits.

INCLUDED IN THIS KIT:

- 12 Pre-hinged side panels including 1 Double Door gate panel
- 24 custom-fit nylon connectors
- 12 Elastic Cords for securing the cover
- 1 Cover including cover support tubes

Step 1 - Unfold and Connect

Unfold the pre-hinged panels into a 4 sided rectangle. Locate the pin end and the receiving end of the assembly and connect the two by dropping the pin in the receiver. (as shown in figure below)

Step 2 - Panel Connectors

Insert the panel connectors into the tops and the bottoms of each panel at each hinge location as shown here.

NOTE
The unused portion of the connectors should be positioned outside of the kennel.

Step 3 - Roof Assemble

First assemble the cover support tubes. Each section slides together. Insert the support tubes into the top of the connectors, as shown here. Insert the cover tubes into the tops of the connectors as shown here.

Add the cover, tighten the hook and loop at each corner and secure the cover to the panels using the elastic cords as pictured.

Your Expandable kennel may be used with or without a cover. It is designed for stability.
The assembly is now complete. Remarkable fast and easy!

Expanding your EXPANDABLE pet kennel

This expunctional pet kennel was designed to allow for expansion to a wide variety of configurations by using additional kits. You will find this to be as easy as the initial assembly using No Tools & No Brackets.

How to expand your EXPANDABLE pet kennel An example

Every 2' section is connected with a innovative spring-loaded hinge and every hinge location is secured by a custom-fit nylon connector. They are the keys to this kennel's simple assembly and expansion capabilities.

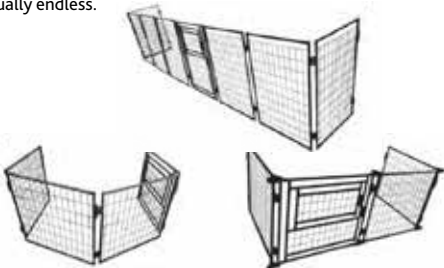

Release the spring hinge at any corner and rotate in parallel to the adjoining side panel. Add additional panels to complete this configuration. Simply re-attach the panels at the corners using the spring-loaded hinges.

Adding a divider panel may be done quickly and easily. Insert a complete 4' panel (2 sections of 2') and attach using a connector as shown here.

As shown in the pictures an additional cover can be added to any part of the kennel that is 8' x 4' in shape. Unlike any other modular kennel in the industry covers may be added next to each other.

This versatile kennel can also be used as a gate system to keep animals in or out of certain areas. The utility of this kennel is virtually endless.

This unique expandable kennel can be changed or further expanded at any time in only minutes.

IMPORTANT CAUTIONS

- It is highly recommended when you use your kennel outdoors, especially with a cover, secure the kennel with ground stakes for protection against wind.
- If your pet is placed in your kennel make certain your pet is provided with ample food and water for the time period.
- Do not leave your pet alone for extended periods of time in your kennel. Changing your pet's surroundings and access to exercise is critical to your pet's health – both physical and mental.
