(EN)

Build and assemble cubes to personal preferences!

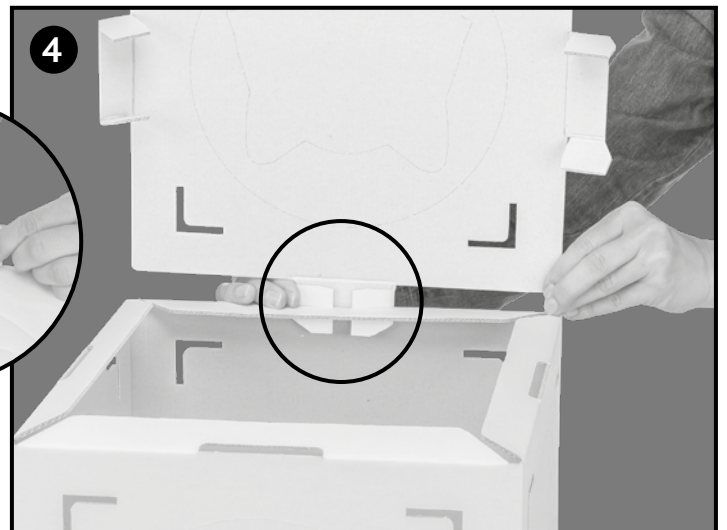

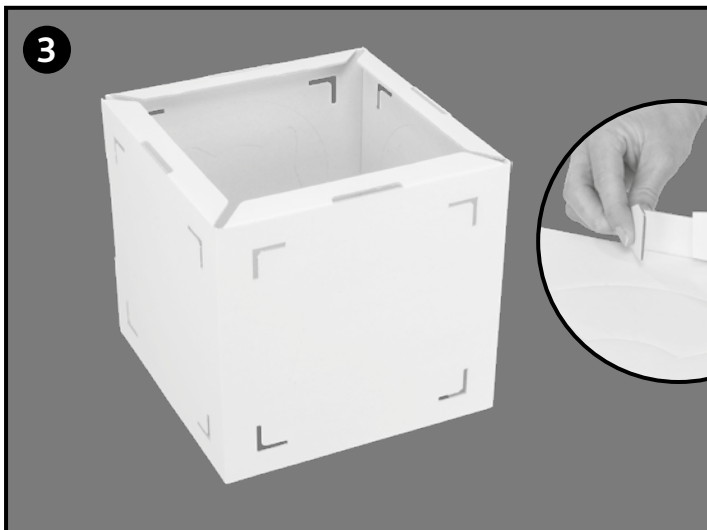

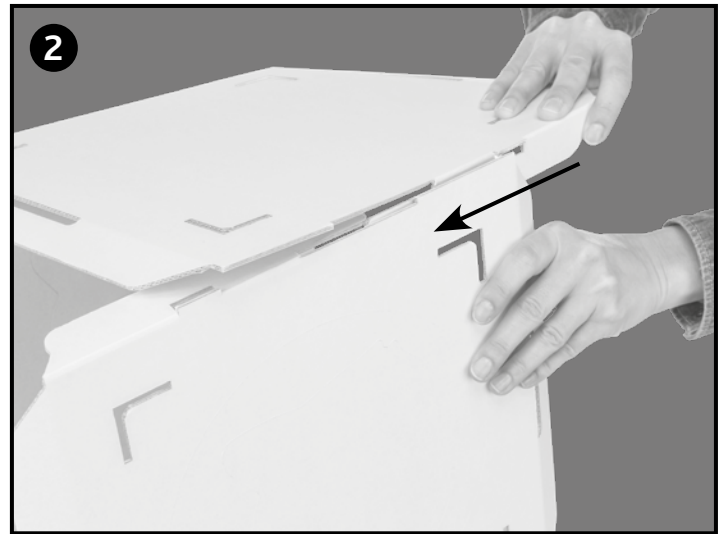

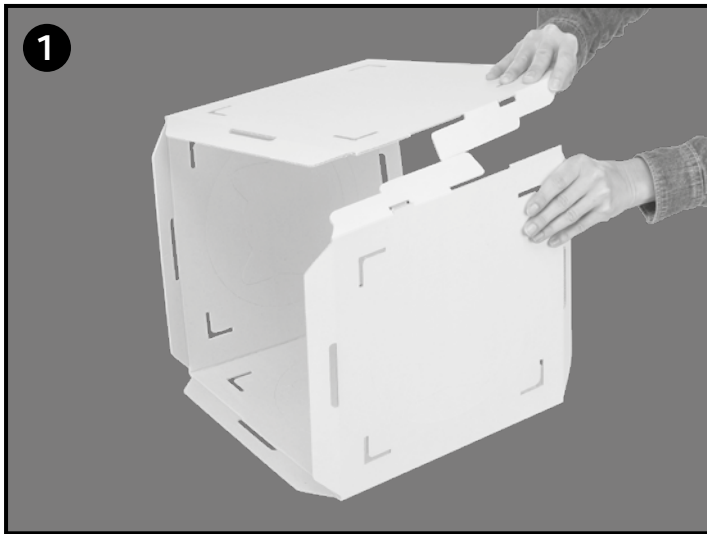

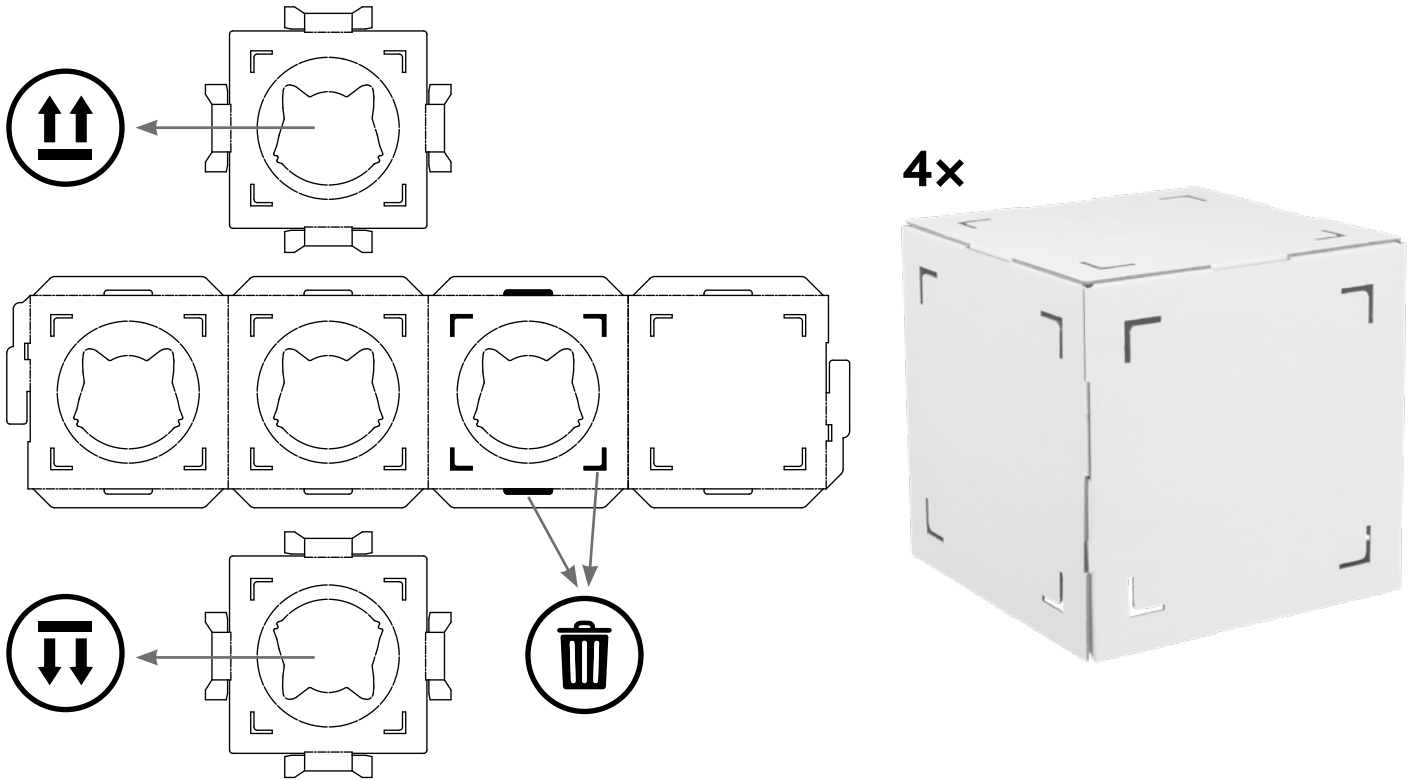

- For safety reasons, do not stack too high - 4 stacked cubes are the recommended maximum.
- Only have a pre-cut opening facing up with the cutout removed.
- If a top opening is not desired, rotate the cube for a solid side facing up.

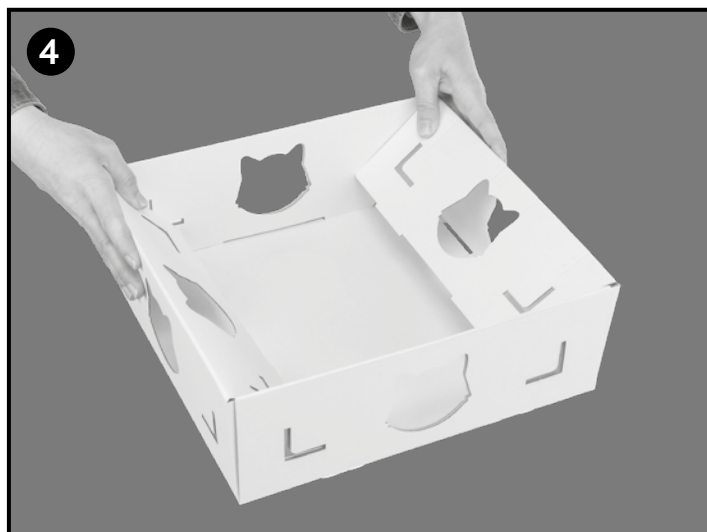

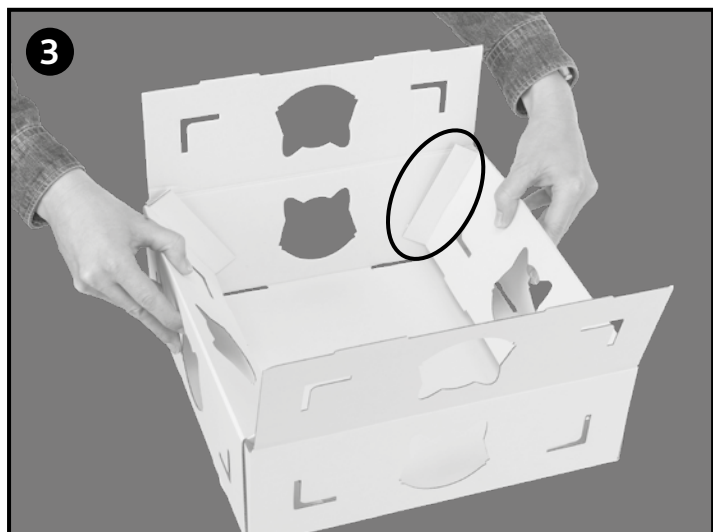

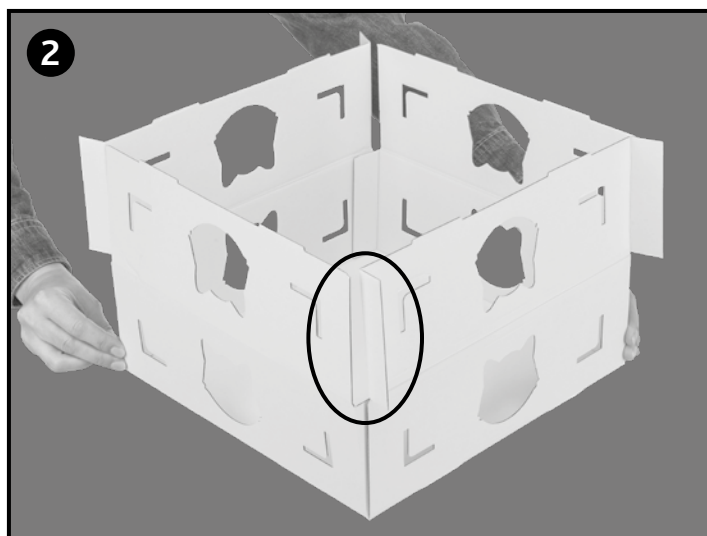

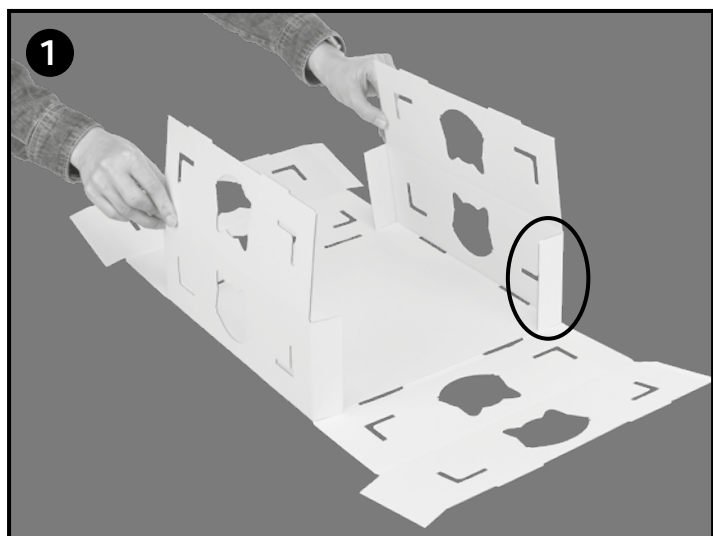

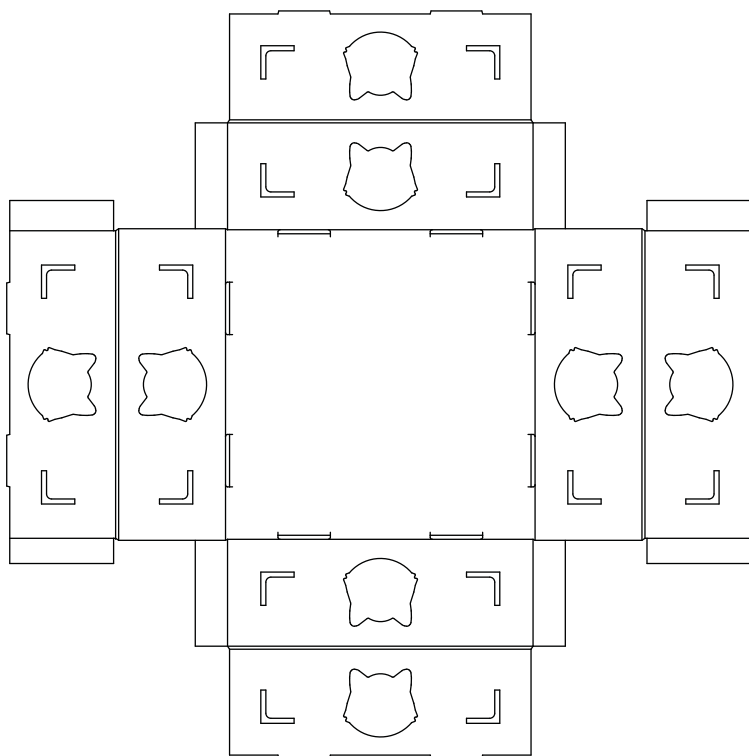

(FR)

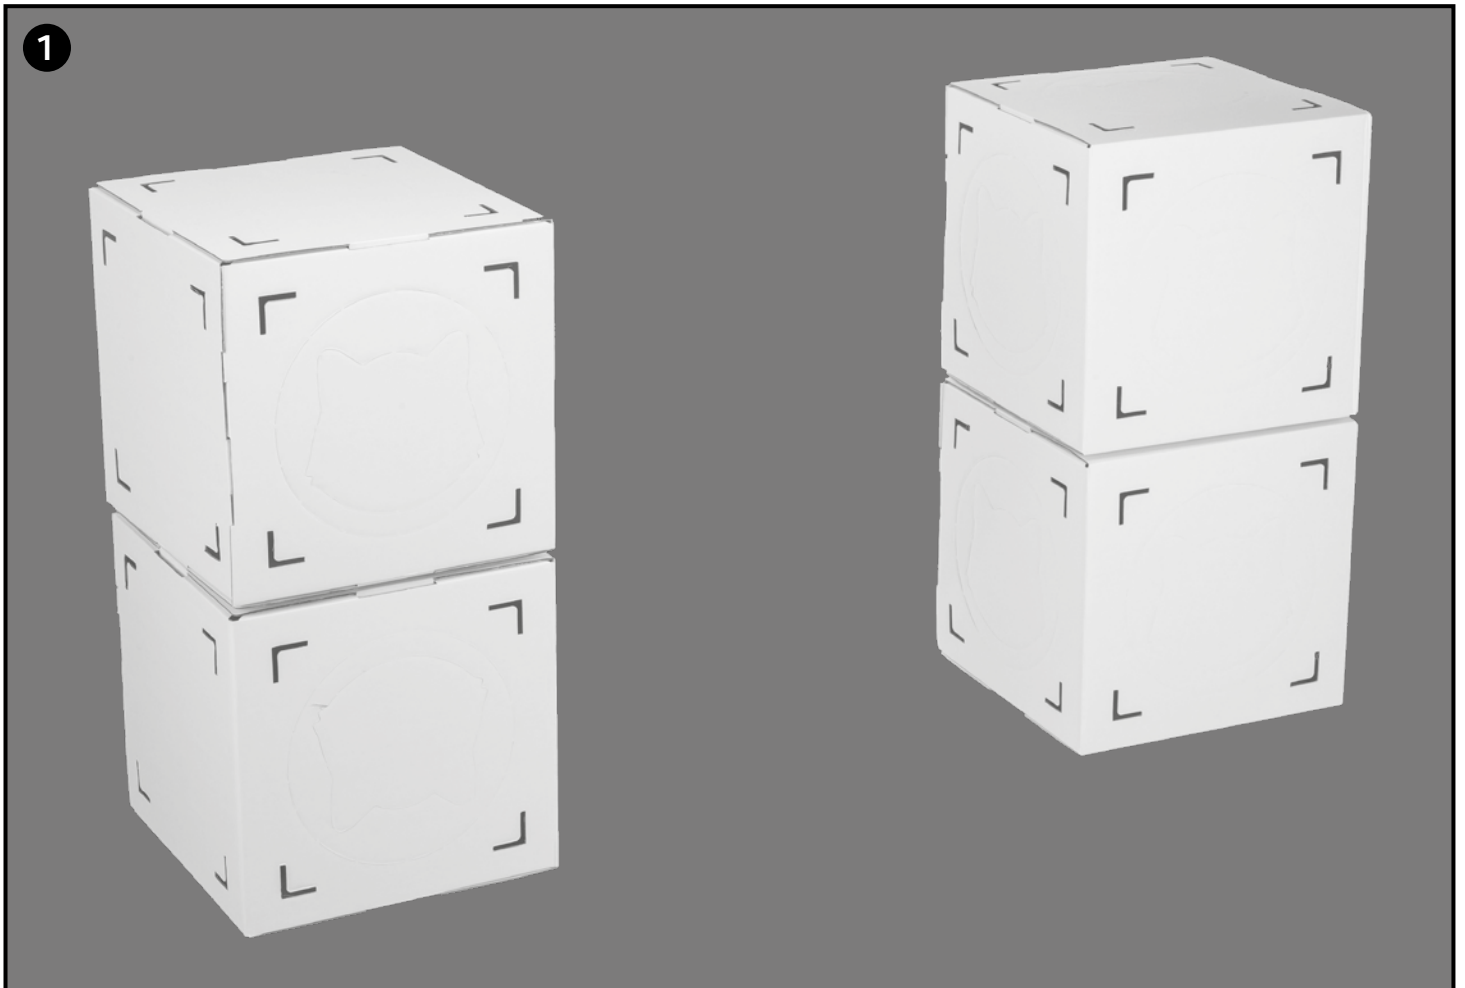

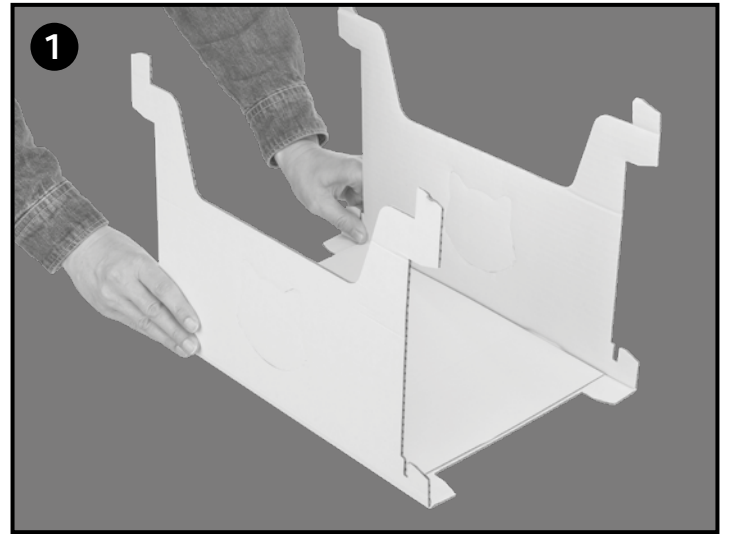

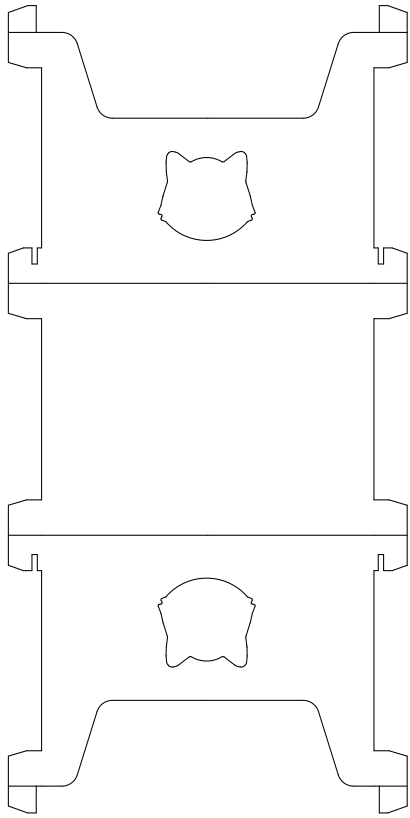

Ne construisez pas trop haut pour des raisons de sécurité (recommandation : 4 boîtes maximum). Le trou du haut d'une boîte doit toujours être complètement enfoncé. Sinon, tournez les cubes de manière à ce que la face complètement fermée soit tournée vers le haut. Ne retournez jamais un cube dont la face prédécoupée mais encore fermée est tournée vers le haut.

(ES)

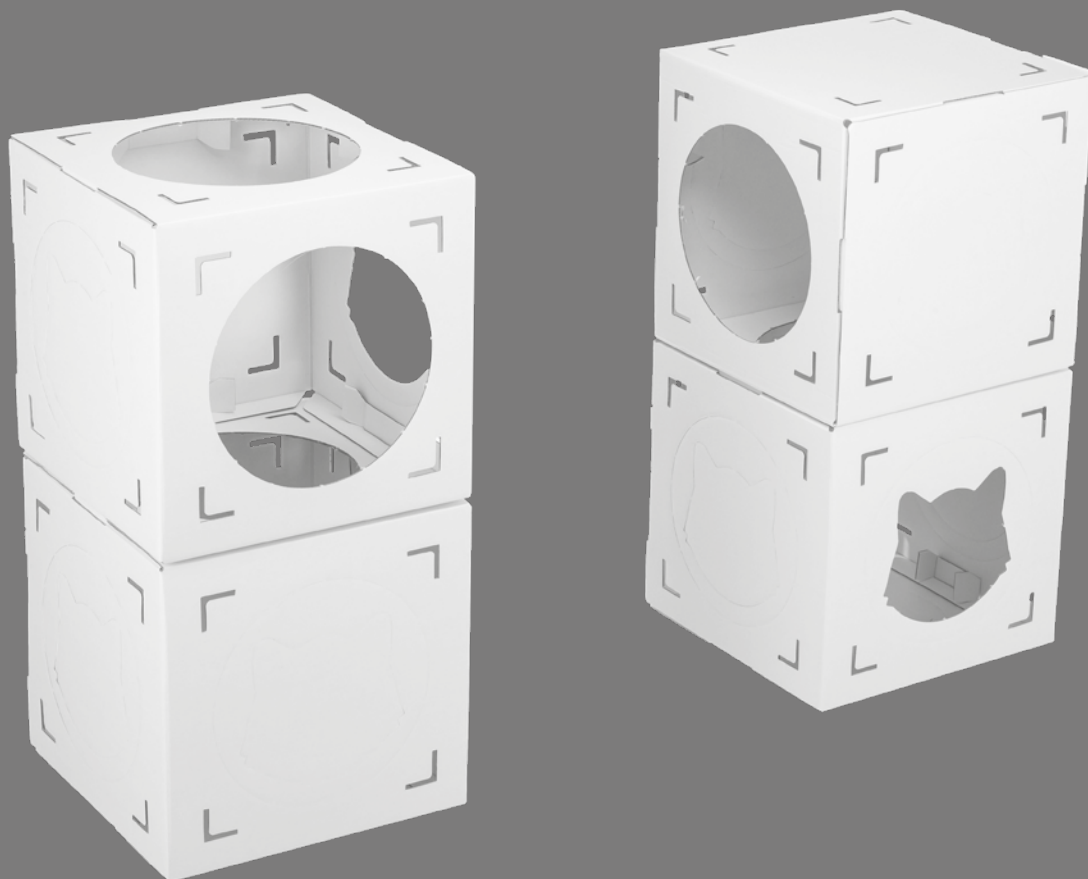

No construya demasiado alto por razones de seguridad (recomendación: 4 cajas como máximo). El agujero de la parte superior de una caja debe estar siempre completamente presionado. Alternativamente, gire los cubos de modo que el lado completamente cerrado quede hacia arriba. Nunca gires un cubo con la cara precortada pero aún cerrada hacia arriba.
