

(DE) Gehhilfe

Mit Tierärzten entwickelt
 • zur Unterstützung nach Operationen, bei Krankheit oder Lähmung
 • Hilfe beim Spazierengehen, beim Treppen oder ins Auto steigen
 • ermöglicht das Tragen der zu unterstützenden Körperpartie
 • für Vorder- und Hinterbeine geeignet
 • aus komfortablem Neopren/Polyester

(EN) Walking Aid

Developed with veterinarians
 • as support after operations, during illness or for pets with paralysis
 • help with walking, climbing or descending stairs or getting into a car
 • allows carrying of the body part that needs support
 • suitable for front and hind legs
 • made of comfortable neoprene/polyester

(FR) Aide à la marche

Développé avec des vétérinaires
 • apporte un soutien après les opérations, pendant la maladie ou chez les animaux paralysés
 • aide à marcher, à monter ou descendre les escaliers, ou à monter en voiture
 • facilite le transport de la partie du corps qui nécessite d'être soutenue
 • convient aux pattes avant et arrière
 • en néoprène/polyester confortable

(IT) Imbracatura di sostegno

Sviluppata in collaborazione con un team di esperti
 • da utilizzare dopo gli interventi chirurgici, durante la malattia o per animali con paralisi
 • aiuta per camminare, per salire o scendere le scale o in automobile
 • consente di supportare una parte del corpo del cane
 • adatta per le zampe anteriori e posteriori
 • in neoprene confortevole/poliestere

(NL) Loophulp

In samenwerking met dierenartsen ontwikkeld
 • ter ondersteuning na een operatie, bij een aandoening of verlamming
 • assistentie tijdens een wandeling, om de trap op of de auto in te helpen
 • maakt ondersteuning van het betreffende lichaamsdeel mogelijk
 • geschikt voor de voor- en achterpoten
 • van comfortabel neopreen/polyester

(SV) Gåhjälpmödel

Utvecklad tillsammans med veterinärer
 • som stöd efter operation, under sjukdom eller för hunddjur med förlamning
 • hjälp vid promenader, klättring, gå i trappor eller i en bil
 • möjliggör bärande av kroppsdelar som behöver stöd
 • lämplig för fram- och bakben
 • tillverkad av flexibel neopren/polyester

(DA) Ganghjælp

Udviklet med veterinærer
 • som støtte efter operation, under sygdom eller til kæledyr med lammelser
 • hjælp til at gå, komme op og ned af trapper eller i bil ud af bilen
 • giver loft til den kropsdel, der kræver støtte
 • egnet til for- og bagben
 • består af fleksibel neopren/polyester

(ES) Andador

Desarrollado por veterinarios
 • como apoyo tras cirugías, durante enfermedad o para mascotas con parálisis
 • ayuda a andar, subir o bajar escaleras o del coche
 • permite portar la parte del cuerpo que necesita apoyo
 • adecuado para patas frontales y traseras
 • hecho de neopreno/poliéster flexible

(PT) Arnês de reabilitação – apoio para caminhar

Desenvolvido em conjunto com veterinários
 • apoio pós-operatório, durante a doença ou para animais com paralisia
 • apoio para caminhar, subir ou descer escadas ou para entrar no carro
 • permite um apoio à parte do corpo que necessita de apoio
 • adequado para as patas frontais e traseiras
 • em neopreno/poliéster confortável

(PL) Uprząż rehabilitacyjna

Opracowywane przez lekarzy weterynarii
 • Wsparcie i stabilizacja po operacjach, podczas chorób lub w dla zwierząt z paraliżem
 • Pomoc w chodzeniu, pokonywaniu schodów lub wsiadaniu do samochodu
 • Umożliwia łatwe podnoszenie części ciała wymagającej podparcia
 • Odpowiednia do przednich i tylnych łap
 • Wykonana z elastycznego neoprenu / poliestru

(CS) Pomůcka při chůzi

Vytvořeno s veterináři
 • podpora po operaci, během nemoci nebo užívání s parályzami
 • pomáhá s chůzí, při chůzí ze schodů a do schodů nebo při nastupování do auta
 • umožňuje snadnou podporu částí těla vyžadující podporu
 • vhodné pro hrudní i pánevní končetiny
 • vyrobeno z flexibilního neoprenu/polyestru

(RU) Помощь при ходьбе

Разработано ветеринарами
 • для поддержки после операции, во время болезни или парализованных животных
 • для оказания помощи при ходьбе, перемещении по лестнице или при посадке в автомобиль
 • позволяет бережно переносить поддерживающую часть тела
 • подходит для передних и задних лап
 • из эластичного материала, неопрен/полиэстер

Zur Größenbestimmung messen Sie bitte am stehenden Hund den Umfang direkt hinter dem Ellbogen bzw. in der Kniehöhe. Bei dickem Fell muss das Maßband fest anliegen. Weitere Informationen entnehmen Sie bitte dem Etikett auf dem Verpackung. (1) To determine the correct size please measure the circumference directly behind the elbow and the fold of the knee when the dog is standing. If the dog has thick coat, the tape measure needs to be tight. More information inside the packaging. (2) Aim to determine the circumference of the dog's front leg and the back leg. Measure the circumference of the dog's front leg at the elbow and the circumference of the dog's back leg at the hock joint. (3) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (4) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (5) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (6) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (7) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (8) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (9) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (10) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (11) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (12) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (13) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (14) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (15) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (16) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (17) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (18) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (19) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (20) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (21) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (22) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (23) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (24) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (25) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (26) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (27) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (28) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (29) For a more accurate measurement, take a photo of the dog's front leg and the back leg. (30) For a more accurate measurement, take a photo of the dog's front leg and the back leg.
